## Bugfix

# LapMonitor V2.2.1 - 28 Juin 2021

### Prerequisites

- Supported OS (x64 only):
  - Windows 7 SP1, Windows 8.1, Windows 10 version 1607 or higher
- LapMonitor uses the **.net Framework V4.8.0** You can download it from the Microsoft website.

<https://dotnet.microsoft.com/download/dotnet-framework/net48>

**[LMR-67] [PiToolbox]** Fixed an issue with the loading of PiToolbox files.

## New Features

# LapMonitor V2.2.0 - 20 April 2021

### Prerequisites

- Supported OS (x64 only):
  - Windows 7 SP1, Windows 8.1, Windows 10 version 1607 or higher
- LapMonitor uses the **.net Framework V4.8.0** You can download it from the Microsoft website.

<https://dotnet.microsoft.com/download/dotnet-framework/net48>

 **[LMR-63] [Project browser]** A new option has been added to align the first lap of each secondary project. When the option is checked, the automatic offsets calculation changes to align the first laps with the first one of the main project. You have to also check the “enable offsets” to take into account the offsets. The manually modified offsets are kept as-is.

 **[LMR-64] [LMR-65]** Update of third party libraries.

 **[LMR-66] [License]** LapMonitor supports now offline licensing. For more information, please refer to the documentation.
